IN THE CLAIMS

1.   (Currently Amended) A computer-implemented method for creating a presentation, comprising:

(a)   matching a profile against a simulation domain, where n the profile comprises a set of criteria;

(b) (a) presenting information indicative of a goal:

(c) (b) integrating information that motivates accomplishment of the goal;

(d) (e) monitoring progress toward the goal and providing feedback that further motivates accomplishment of the goal, wherein the feedback i in accordance with the profile; and

(e) (d) displaying details of the computer-implemented method and displaying the presentation as the presentation executes, wherein the presentation provides a cognitive educational experience.

2.   (Previously Presented) The computer-implemented method for creating a presentation as recited in claim 1, including instantiating a particular feedbac model based on characteristics of a target user.

3.   (Previously Presented) The computer-implemented method for creating a presentation as recited in claim 1, including receiving and analyzing user responses using an expert system to determine details of the computer-implemented method to display.

4.   (Previously Presented) The computer-implemented method for creating a presentation as recited in claim 1, including browsing details of an object as the presentation executes.

5.   (Previously Presented) The computer-implemented method for creating a presentation as recited in claim 1, including displaying source code of the presentation as the presentation executes.

-2-

6.   **(Previously Presented)** The computer-implemented method for creating a presentation as recited in claim 1, including modifying the presentation on a user indicia as the presentation executes.

7.   **(Previously Presented)** The computer-implemented method for creating a presentation as recited in claim 1, including capturing portions of the presentation in response to a user indicia as the presentation executes.

8.   **(Previously Presented)** The computer-implemented method for creating a presentation as recited in claim 1, including tailoring feedback based on a user indicia as the presentation executes.

9.   **(Previously Presented)** The computer-implemented method for creating a presentation as recited in claim 1, including presenting a tailored simulation based on a user indicia as the presentation executes.

10. **(Currently Amended)** An apparatus that creates a presentation, comprising:

   (a)   a processor that runs a computer program to create the presentation;

   (b)   a memory that stores information under control of the processor;

   (c)   logic that matches a profile against a simulation domain, wherein the profile comprises a set of criteria;

   (d) (c) logic that presents information indicative of a goal;

   (e) (d) logic that integrates information that motivates accomplishment of the goal;

   (f) (e) logic that monitors progress toward the goal and provides feedback that further motivates accomplishment of the goal, wherein the feedback is in accordance with the profile; and

   (g) (f) logic that displays details of the computer program and that displays the presentation as the presentation executes, wherein the presentation provides a cognitive educational experience.

11. **(Previously Presented)** The apparatus that creates a presentation as recited in claim 10, including logic that instantiates a particular feedback model based on characteristics of a target user.

-3-

12.   **(Previously Presented)** The apparatus that creates a presentation as recited in claim 10, including logic that receives and analyzes user responses using an expert system to determine details of the computer program to display.

13.   **(Previously Presented)** The apparatus that creates a presentation as recited in claim 10, including logic that browses details of an object as the presentation executes.

14.   **(Previously Presented)** The apparatus that creates a presentation as recited in claim 10, including logic that displays source code of the presentation as the presentation executes.

15.   **(Previously Presented)** The apparatus that creates a presentation as recited in claim 10, including logic that modifies the presentation based on a user indicia as the presentation executes.

16.   **(Previously Presented)** The apparatus that creates a presentation as recited in claim 10, including logic that captures portions of the presentation in response to a user indicia as the presentation executes.

17.   **(Previously Presented)** The apparatus that creates a presentation as recited in claim 10, including logic that tailors feedback based on a user indicia as the presentation executes.

18.   **(Previously Presented)** The apparatus that creates a presentation as recited in claim 10, including logic that presents a tailored simulation based on a user indicia as the presentation executes.
